## SOUTHERN ICE FIELD GLACIERS

### Kaweskar Route

To sail through the glaciers of the Southern Ice Field is a fascinating and incredible experience that motivates travellers who look for virgin and uncharted places to visit. This route offers an incredible amount of glaciers to explore and admire while sailing among icebergs or simply walking on a glacier moraine. The Southern Ice Field, and its counterpart, the

Northern Ice Field are the third fresh water reserve on the planet. The Kaweskar Route gives you the chance to observe the vestiges of the last glaciations, with fjords and glaciers which you can see for yourself while you sail on M/V Skorpios III, with its outstanding and personalised service.

## KING PENGUINS IN TIERRA DEL FUEGO

### Park King Penguin

To visit Tierra del Fuego and the Park King Penguin at the end of the world, it is an experience that it is necessary to live. Early Morning from Punta Arenas, we will board the airplane from Aerovías DAP and we will fly to Porvenir in Tierra del Fuego, enjoying from the heights a unique image of the mythic Strait of Magellan and its environment, flying during 20 minutes. At the aerodrome of the city, a shuttle is waiting for us to realize a tour for the town and its surroundings. We will continue our trip 120 kms to the south to Bahía Inútil to visit the Park Penguin King, which offers to the visitors the possibility of observing, respectfully with the environment, this wonderful species of penguins that impress for their color and size. King Penguin (*Aptenodytes patagonicus*) is a migratory bird that moves from their breeding sites in some sub - Antarctic islands in search of food. It is the second largest species of Penguin after Emperor Penguin (*Aptenodytes forsteri*). We will stay 1 hour at this place and we will back to Porvenir enjoying the Patagonian landscape and its wild natural environment. Return to Punta Arenas at the end of the day by air.
