GLACIERS IN THE SOUTHERN ICE FIELD

To sail towards the glaciers on the Southern Ice Field is an experience that fascinates and motivates travelers who enjoy exploring unique and untouched places. This route offers the possibility to sight, explore and contemplate a large number of glaciers while sailing through icebergs, or simply walking along a glacier moraine. The Southern Ice Field and the Northern Ice

Field are considered the third most important reserve of freshwater on the planet. This is a unique opportunity to see the remnants of the last glaciations, while receiving the personalized service offered on Motor vessel Skorpios III, which covers the route, sailing to the very heart of these glaciers and fjords which show us Nature in all her glory and breathtaking beauty.

SAN PEDRO DE ATACAMA

San Pedro is a small village located where the driest desert on earth reaches the high plateau, bringing heaven and earth together, and where the human soul finds a place in which to rest and recharge its energy. Here, you may choose different excursions in the company of the best-trained guides who will give you an overview of the natural beauties and cultural features

of the area. Special vehicles will drive you through the desert, taking you on your tours, which might include a visit to the Valle de la Luna, the Tatio geysers, the Tara Salt Flats, Laguna Cejar, Valle Arcoiris, Ojos del Salar de Atacama or the most interesting villages in the Andean Plateau. Chile is a country of contrasts, and this programme is a faithful reflection of this, as it combines the extreme heat of the desert and Andean plateau with the icy cold of the glaciers... Live it to the hilt.
