GLACIERS IN THE SOUTHERN ICE FIELD

To sail towards the glaciers of the Southern Ice Field is an experience that enchants and motivates all travelers who love exploring unique and virgin sites. This route offers an enormous range of glaciers which can be sighted, explored and contemplated, while you sail through icebergs or simply walk along a glacier's moraine.

The Southern Ice Field, together with the Northern Ice Field, are the third most important source of fresh water on the planet. They give us a unique opportunity to look at the last remnants of a glaciation, to which we must add personalized shipboard service on M/V Skorprios III, while it covers this route into these fjords and glaciers.

TORRES DEL PAINE NATIONAL PARK - NATALES

To combine the Southern Ice Field with Torres del Paine is the best alternative to get to know and relax in this part of Patagonia. This Chilean National Park, which is 115 kilometres north of Puerto Natales, has been declared a Unesco heritage reserve. Its incredible natural beauty makes it one of the most popular and sought-after tourist

destination. There are no words to describe the feeling of freedom and clean air that surrounds us in this emblematic place. Its imposing Towers, its enormous lakes surrounded by luxuriant vegetation, its abundant fauna, which includes ñandus, condors, fox, puma and guanaco, will remain engraved in your memory. This programme combines two of the most important natural beauties of Patagonia, live them to the hilt...
